

The IMAX Experience

The IMAX theater is a lot like other movie theaters, but it has a **GIANT** screen. Movies in an IMAX theater can be very exciting. Some people say they feel like they are in the movie instead of just watching it.

I might have to **wait outside** the theater before going in. I will do my best to wait patiently until a staff member says it is my turn to go in.

Once inside, I will **stay close** to the people I came with so we can find our seats and sit down. If I like to stand or move around during movies, I can try to find a seat in the back row or on the end of a row.

To watch the movie I will have to wear **“3D” glasses**. They will make me feel like I am in the movie instead of just watching it on a screen.

The lights will **turn off** when the movie starts and it will **get very loud**. If I am uncomfortable, I can ask to leave the theater at any time.

To **stay safe**, I will do my best to stay in my seat. I could get hurt or hurt others if I run in the aisles or get too close to the railing in front of the screen.

The movie will last about 45 minutes. When it is finished, the lights will turn back on. I will try my best to **stay close** to the people I came with while we walk out of the theater.
